Boston Society for Architecture Strategic Plan

The Boston Society for Architecture exists to improve the quality of life for Boston-area residents by championing innovation in the built environment. We believe in the power of architecture and design to imagine new futures and create positive impact in our work and our lives. We activate our diverse and passionate network through a portfolio of collaborative initiatives that apply solutions that move us toward a more equitable and sustainable world.

Mission

The Boston Society for Architecture exists to improve the quality of life for Boston-area residents by championing innovation in the built environment.

To achieve this purpose, the BSA activates our diverse and passionate network through a portfolio of collaborative initiatives that apply solutions that move us toward a more equitable and sustainable future.

Join us as we build a just and sustainable Boston, together.

We believe...

Systemic change requires deep partnerships.

We curate ideas that activate our vast network to influence broader ecosystems.

Progress demands diverse perspectives.

We embrace inclusivity, as everyone has a role to play to drive equitable outcomes in the built environment.

Climate and equity are connected.

We understand that climate change impacts communities that are the least responsible and most vulnerable.

For true impact, we need action and audacity.

We think big and take risks on innovative solutions alongside local communities and partners.

Transformative work is never done.

We imagine and build desirable futures through continuous collaboration and experimentation with our network.
